

**How to build a mass stove/masonry stove. Workshop at Mette Hoegh and Lasse Kroeyer Rasmussen, Torpevej 5, Torpe, 4160 Herlufmagle, Denmark from the 3.-7. of May, 2010 both days included.**

Renewable Energy has had more than 70 workshops where people learn to build a mass stove.

Our next workshop is from the 3rd of May to the 7th of May 2010.

The substance of the workshop is:

- A theoretical going through the type of the stove
- The wood burning aspects and "clean combustion"
- Knowledge of materials especially the fireproof materials.
- We build together the inside of a mass stove during 4 days.
- In this way the stove is taken through brick by brick
- We build up a briefcase with notes and drawings, very useful later when you are by yourself building mass stoves.

For better learning there will be max. 8-10 persons accepted at the workshop.

The price for the workshop is 2300 d. kr incl. lunch and coffee. Please contact us if you are searching for hotel, camping etc. during the workshop.

Hope to see you

---

I want to participate in the workshop in week 20, 2009 in Herlufmagle:

Name: \_\_\_\_\_

Adress: \_\_\_\_\_

Phone/emailadress: \_\_\_\_\_

Who are you (mason, builder, D.I.Y.....):

**Forny Energi ApS**

Øbrovej 9

4295 Stenlille
